Additional Courses for Links 386 CD

All courses in the Links Championship Course series are compatible with Links 386 CD including:

Harbour Town (included with Links 386 CD)	Pebble Beach
Banff Springs (included with Links 386 CD, U.S.)	Bighorn
The Belfry (included with Links 386 CD, Europe)	Barton Creek
Pinehurst No. 2	Prairie Dunes
Innisbrook	Mauna Kea
Castle Pines	Firestone
Bountiful	(More coming)

These additional Championship Courses must be purchased separately and are available on both 3.5 inch floppy disks and on CD-ROM (some may not be currently available on CD-ROM). Check with your local retailer for availability. Only CD-ROM versions contain aerial flybys.

How to Add Courses to Links 386 CD

To add courses to Links 386 CD, do the following:

Courses on CD-ROM: (includes aerial flybys)

Option 1:   **Do not install on the hard drive. Play from CD only.**

Even if you are not planning to copy the course file to your hard drive, you must run the course installation program to install the Recorded Player files and the Splash Screens. Follow the instructions that come with the course. This will also catalog the course for play from CD. Courses played from CD will render slightly slower than courses played from the hard drive.

Option 2:   **Install on the hard drive. Play from hard drive or CD.**

Run the course installation program to install the Course file, the Recorded Player files and the Splash Screens. Follow the instructions that come with the course. Once the course is installed, you can play from the hard drive or from the CD. Since the flybys are not copied to the hard drive, if you want to view the flybys, you will have to put the CD in the CD-ROM drive during play.

Courses on FLOPPY DISK: (does not include aerial flybys)

Hard drive installation required.

To install the course on your hard drive, follow the course installation instructions. Older copies of these courses (manufactured before Links 386 CD was released) will not have an option to install the course for Links 386 CD. In this case, select the Links 386 Pro installation and make sure the path points to the Links 386 CD directory.
